W05-P1: Demo how to use environment variable DATABASE

W05-P2: Using pgAdmin 4 to get table card_xx from Supabase

W05-P3: Using database.js to connect to Supabase and show card_xx data

The screenshot shows the pgAdmin 4 interface with the 'w05_55_blog' database selected. The 'database.js' file is open, showing the database connection configuration. The configuration includes the following details:

- Host: localhost
- Port: 5432
- Database: wp1_demo_55
- Password: 0000

The 'testDB' function is also visible, which uses the 'pool.query' method to execute a SQL query: 'select * from card_55'. The query results are logged to the console.

W05-P4: For route /api/card_xx, get Json data from Supabase

The screenshot shows a web browser displaying the JSON data returned by the /api/card_xx route. The data is a list of objects, each representing a card. The objects have the following structure:

- id: (e.g., 1, 2, 3, 4, 5, 6, 7)
- title: (e.g., "Seven Reasons Why Coffee Is Awesome", "Travel To Paris", "Coffee Brings Friendship", "Coffee Make You Feel Good", "Coffee Make You Calm", "101 Tower In Taipei", "Sun Rise From The Mountain")
- description: (e.g., "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.", "Lorem ipsum dolor sit amet consectetur adipisicing elit.")
- category: (e.g., "lifestyle", "TRAVEL", "lifestyle", "lifestyle", "lifestyle", "travel", "travel")
- img: (e.g., "/images/photo-1.jpg", "/images/photo-2.jpg", "/img/photo-3.jpg", "/img/photo-4.jpg", "/img/photo-5.jpg", "/img/photo-6.jpg", "/img/photo-7.jpg")
- remote_url: (e.g., "", "", "", "", "", "", "")

```
